PROFESSIONAL SUMMARY

B.Tech Graduate in Computer Science and Engineering with Artificial Intelligence and Data Science with hands-on experience in Machine Learning, Python, Django, and MySQL . Seeking an entry-level Software Engineer role to leverage technical skills in building scalable web applications

SKILLS

Programming: Python | Object-Oriented Programming | Data Structures & Algorithms | Problem Solving

Backend & Web: Django REST Framework | RESTful API Development | React.js | HTML | CSS | Bootstrap

Database: MySQL | SQL Queries | Database Management | CRUD Operations | Database Integration

AI/ML: Machine Learning | NumPy | Pandas | Scikit-learn | PyTorch | Keras | CNN | OpenCV | LLMs

Software Engineering: Software Development | Software Design | Debugging | Code Optimization | SDLC

Testing & Tools: Unit Testing | API Testing | Postman | Git | GitHub | VS Code

EXPERIENCE

Python Full Stack Trainee at Vcubes Institution

Nov 2025 - Jun 2026

- Developed and maintained a full-stack web application, Smart Career Planning Platform, using **Python, Django REST Framework, React.js and MySQL**, implementing **10+ RESTful APIs**.
- Designed and implemented backend modules for **profile management, resume processing, career recommendations and job management**, following software development and API design principles.
- Developed reusable backend components and business logic for personalized career recommendations based on user profiles and resumes.
- Optimized **MySQL queries and database structures**, improving API response time by approximately 30% and enhancing application performance.
- Performed **unit testing, API testing, debugging and data validation**, resolving integration issues to improve application reliability.

Python and MySQL Trainee at Revature

Jun 2025 - Sep 2025

- Completed an 11-week hands-on training in **Python, SQL and Git**, developing **50+ test cases** and database queries.
- Developed Python scripts using **Object-Oriented Programming (OOP)** for data validation and automated testing across multiple use cases.
- Applied **debugging and problem-solving techniques** to troubleshoot application and database issues.
- Optimized SQL queries to improve execution efficiency and strengthened skills in **database testing, troubleshooting and version control**.

PROJECTS

Crop Disease Detection(Python | PyTorch | CNN | OpenCV | NumPy | Pandas | Scikit-learn)

- Developed a Python-based application that allows users to upload crop leaf images and identify potential diseases.
- Implemented an end-to-end image processing and classification workflow using **Python, OpenCV and PyTorch**.
- Developed reusable preprocessing components for **image resizing, noise reduction, normalization** and contrast enhancement.
- Tested and validated the classification workflow on agricultural image datasets to ensure reliable application performance.

Movie Recommendation System(Python | Flask | Pandas | NumPy | Scikit-learn)

- Developed a Python-based recommendation application using **Flask, Pandas and Scikit-learn** to provide personalized movie recommendations.
- Implemented reusable **data preprocessing, feature extraction** and recommendation workflows using cosine similarity.
- Developed backend functionality to process user requests, search movie data and return relevant recommendations.

EDUCATION

Kakinada Institute of Engineering and Technology , Kakinada, AP, India

2021 - 2025

Bachelor Of Technology, CSE-AIDS - **7.78 CGPA**

CERTIFICATIONS

- Python Full Stack Course by Vcubes
- Foundation of Modern Machine Learning by IIITH
